

CONSENT FOR CT SCAN

Name: _____ Date: _____

Your doctor has asked that a CT scan be performed using intravenous contrast material. This is an iodine containing solution that aids in the visualization of your organs and blood vessels, which helps in the diagnosis of pathology in various parts of your body. In order for us to administer this "dye" you must be informed of the possible risks involved.

I have read the above and understand it all.

After injection of the intravenous contrast, most patients feel a sensation of warmth, a funny metallic taste in their throat, transient nausea and a feeling of warmth in the groin. Some patients develop hives and itching, but this is self-limited and rarely needs to be treated with antihistamines. 1 in 500 patients may develop a severe reaction and 1 in 5,000 may have a life threatening reaction, all of which may have to be aggressively treated with medications. These reactions may involve; tightness in the throat; facial swelling; difficulty breathing; drop in blood pressure or even seizure. Generally speaking, intravenous contrast is extremely safe and well tolerated and these reactions are rare.

I have read the above and understand it all.

This attached questionnaire will help us to decide other issues concerning the contrast material, including whether or not you should have it at all. If you have any questions, you will be able to speak to the supervising radiologist. When your questions have been answered or if you do not have any questions, please sign the form below.

I have read the above and understand it all.

PREGNANCY CONSENT FORM

Date: _____

This examination requested by my physician is potentially harmful to my pregnancy, and may cause a miscarriage or congenital deformity. I understand this potential risk to the pregnancy and agree to have the examination performed as requested.

Signature of Patient: _____ Date: _____

Signature of Witness: _____ Date: _____

PATIENT SATISFACTION SURVEY

We are striving to provide you with the best possible care. Please help us to achieve this goal by taking a few minutes of your time to answer the following questions. In doing so you will help us to provide optimum care for all our patients.

Date: _____

Name: (optional) _____ E-mail: _____

Type of examination: _____

Was it easy to schedule your appointment for today's test? Yes No

If no, explain why? _____

Was your scheduler: *(Check all that apply.)*

- Courteous? Yes No
- Attentive to your needs? Yes No
- Efficient? Yes No

Was your examination started on time? Yes No

If not, how long did you wait for your examination:

- Less than 15 minutes
- 15 – 30 minutes
- 30 minutes or more

If more than 15 minutes, did someone explain the reason for delay? Yes No

Was your receptionist: *(Check all that apply.)*

- Courteous? Yes No
- Attentive to your needs? Yes No
- Efficient? Yes No

Was the technologist who performed the procedure: *(Check all that apply.)*

- Courteous? Yes No
- Attentive to your needs? Yes No
- Efficient? Yes No

If your exam required a Radiologist (Doctor): *(Check all that apply.)*

- Courteous? Yes No
- Attentive to your needs? Yes No
- Efficient? Yes No

Please rate your overall experience. *(Circle a number on the scale below to indicate your level of satisfaction)*

Excellent

Any additional comments that you can make would be helpful: *(The use of names would be helpful.)*

Check here if willing to be contacted to provide an online review.

Thank you for taking the time to complete this survey.

Instructions for Diabetic Patients Taking Glucophage (Metformin)

- 1) The patient should take their Glucophage (metformin) the morning of the exam, then discontinue for 48 hours. They may resume this medication after their referring physician has determined through a blood test that their kidney function has not deteriorated.
- 2) Patient must contact either Primary Care physician or Nephrologist to schedule an appointment for a blood test to be taken for evaluation of BUN & CREATNINE.
- 3) Patient must then get authorization from Physician to resume using GLUCOPHAGE (METFORMIN) according to the new lab results.
- 4) Patient should drink at least six eight ounce glasses of water on the day of I.V. contrast administration. I have read and understand the above instructions given to me with regards to GLUCOHPAGE.

Radiologist: _____ Date _____

Patient Name (Print) _____ Date _____

CT INFORMATION SHEET

Name: _____

Date: _____ Height: _____ Weight _____

The following information is needed to help us plan for your study:

Your Age: _____ Your Weight: _____

What symptoms are you having that led your doctor to order this CT scan?

Please list all medications being taken currently: _____

Please answer the following questions:

	Yes	No
Are you a diabetic?	___	___
Are you currently taking Glucophage, Metformin, or Glucovance	___	___
Are you pregnant, or have you recently given birth?	___	___
Are you currently breastfeeding/ nursing?	___	___
Have you eaten in the last 4 hours?	___	___
Have you ever had difficulty having an IV started (bad veins)	___	___
Do you have a vascular access device? (Example: Portacath: Hickman Catherter, PICC Line)	___	___
Have you had any Barium exams in the last week?	___	___
Do you have any allergies to food or medicine?	___	___
If yes, please list: _____		

Have you ever had a Diagnostic Procedure during which you received IV contrast or "DYE"?

If yes, please list type of test: _____

If you have had a prior injection of contrast, did you have any difficulty at all? ___

Do you have any of the following conditions? ___

Bronchial Asthma ___

High Blood Pressure ___

Recent Heart Attack ___

Angina ___

Heart Failure/ Arrhythmia ___

Diabetes Mellitus ___

Kidney Failure ___

Sickle Cell Anemia ___

Multiple Myeloma ___

Pheochromocytoma ___

Please list any other health conditions you may have. _____

PREPARATION INSTRUCTIONS FOR PATIENTS UNDERGOING CORONARY CT ANGIOGRAPHY

- **Do not** drink alcohol or consume any caffeine or other foods or medications that may increase your heart rate (e.g., coffee, tea, cola, mountain dew, jolt, or chocolate; Excedrin or other stimulant medications) for **24 hours** before the test.
- Continue medications as prescribed by your physician, unless otherwise instructed.
- Do not ingest solid foods for at least **six hours** prior to the exam.
- Clear liquids are allowed **up to one hour** before the exam. Clear liquids include: water, clear soda (sprite, 7-up, ginger ale), lemonade, and clear, pulp-free fruit juices (apple or white grape).
- Inform your doctor if you think there is a possibility that you are pregnant or if you are nursing.
- If you have diabetes or kidney disease and are taking glucose-lowering medication, talk to your doctor about stopping the medication and proper scheduling of the test.
- Please bring a list of all your current medications and their dosages with you to the appointment.
- If you have any echocardiography, stress test, coronary angiography or CT/MRI studies performed in the past, please bring the report and/or films with you, if available.
