

## CONSENT FOR CT SCAN

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Your doctor has asked that a CT scan be performed using intravenous contrast material. This is an iodine containing solution that aids in the visualization of your organs and blood vessels, which helps in the diagnosis of pathology in various parts of your body. In order for us to administer this "dye" you must be informed of the possible risks involved.

I have read the above and understand it all.

After injection of the intravenous contrast, most patients feel a sensation of warmth, a funny metallic taste in their throat, transient nausea and a feeling of warmth in the groin. Some patients develop hives and itching, but this is self-limited and rarely needs to be treated with antihistamines. 1 in 500 patients may develop a severe reaction and 1 in 5,000 may have a life threatening reaction, all of which may have to be aggressively treated with medications. These reactions may involve; tightness in the throat; facial swelling; difficulty breathing; drop in blood pressure or even seizure. Generally speaking, intravenous contrast is extremely safe and well tolerated and these reactions are rare.

I have read the above and understand it all.

This attached questionnaire will help us to decide other issues concerning the contrast material, including whether or not you should have it at all. If you have any questions, you will be able to speak to the supervising radiologist. When your questions have been answered or if you do not have any questions, please sign the form below.

I have read the above and understand it all.

PATIENT SIGNATURE: \_\_\_\_\_ DATE: \_\_\_\_\_

## PET/CT INFORMATION SHEET (Page 1 of 2)

Patient's Name: \_\_\_\_\_ Age \_\_\_\_\_

Date: \_\_\_\_\_ Height: \_\_\_\_\_ Weight \_\_\_\_\_

Reason for PET/CT Scan: \_\_\_\_\_

Have you had a PET or PET/CT Scan before?  Yes  No

If yes, when and where? \_\_\_\_\_

Have you had a surgery or biopsy? If yes, what type and when?  Yes  No

Please list type of surgery and surgeon: \_\_\_\_\_

Do you have any history of cancer?  Yes  No

Are you taking any steroid medications?  Yes  No

Are you on chemotherapy?  Yes  No

Have you had chemotherapy in the past?  Yes  No

If yes, when was it completed? \_\_\_\_\_

Are you on radiation therapy?  Yes  No

Have you had radiation therapy in the past?  Yes  No

If yes, when was it completed? Who was your treating physician? \_\_\_\_\_

Have you had any recent CT or MRI scans?  Yes  No

If yes, when and where? \_\_\_\_\_

Brief medical history: (Have you suffered any trauma?) \_\_\_\_\_

If a female patient, any chance of pregnancy? \_\_\_\_\_

Blood sugar level: \_\_\_\_\_

Mci's injected: \_\_\_\_\_ Time: \_\_\_\_\_ Site: \_\_\_\_\_

Valium given: \_\_\_\_\_ Injector: \_\_\_\_\_

## PET/CT INFORMATION SHEET (Page 2 of 2)

Patient's Name: \_\_\_\_\_

Please list all medications being taken currently: \_\_\_\_\_

Please answer the following questions:

	Yes	No
Are you a diabetic?	___	___
Are you currently taking Glucophage, Metformin, or Glucovance	___	___
Are you pregnant, or have you recently given birth?	___	___
Are you currently breastfeeding/ nursing?	___	___
Have you eaten in the last 4 hours?	___	___
Have you ever had difficulty having an IV started (bad veins)	___	___
Do you have a vascular access device? (Example: Portacath: Hickman Catherter, PICC Line)	___	___
Have you had any Barium exams in the last week?	___	___
Do you have any allergies to food or medicine?	___	___
If yes, please list: _____		

Have you ever had a Diagnostic Procedure during which you received IV contrast or "DYE"?

If yes, please list type of test: \_\_\_\_\_

If you have had a prior injection of contrast, did you have any Difficulty at all?	___	___
Do you have any of the following conditions?	___	___
Bronchial Asthma	___	___
High Blood Pressure	___	___
Recent Heart Attack	___	___
Angina	___	___
Heart Failure/ Arrhythmia	___	___
Diabetes Mellitus	___	___
Kidney Failure	___	___
Sickle Cell Anemia	___	___
Multiple Myeloma	___	___
Pheochromocytoma	___	___

Please list any other health conditions you may have. \_\_\_\_\_

### PATIENT SATISFACTION SURVEY

We are striving to provide you with the best possible care. Please help us to achieve this goal by taking a few minutes of your time to answer the following questions. In doing so you will help us to provide optimum care for all our patients.

Name: (optional) \_\_\_\_\_ Date: \_\_\_\_\_

Type of examination: \_\_\_\_\_

Was it easy to schedule your appointment for today's test?  Yes  No

If no, explain why? \_\_\_\_\_

Was your scheduler: *(Check all that apply.)*

- Courteous?  Yes  No
- Attentive to your needs?  Yes  No
- Efficient?  Yes  No

Was your examination started on time?  Yes  No

If not, how long did you wait for your examination:

- Less than 15 minutes
- 15 – 30 minutes
- 30 minutes or more

If more than 15 minutes, did someone explain the reason for delay?  Yes  No

Was your receptionist: *(Check all that apply.)*

- Courteous?  Yes  No
- Attentive to your needs?  Yes  No
- Efficient?  Yes  No

Was the technologist who performed the procedure: *(Check all that apply.)*

- Courteous?  Yes  No
- Attentive to your needs?  Yes  No
- Efficient?  Yes  No

If your exam required a Radiologist (Doctor): *(Check all that apply.)*

- Courteous?  Yes  No
- Attentive to your needs?  Yes  No
- Efficient?  Yes  No

Please rate your overall experience. *(Circle a number on the scale below to indicate your level of satisfaction)*

1 2  
⏟  
Poor

3 4  
⏟  
Fair

5 6  
⏟  
Satisfied

7 8  
⏟  
Very Satisfied

9 10  
⏟  
Excellent

Any additional comments that you can make would be helpful: *(The use of names would be helpful.)*

\_\_\_\_\_  
\_\_\_\_\_

*Thank you for taking the time to complete this survey.*

## **Instructions for Diabetic Patients Taking Glucophage (Metformin)**

- 1) The patient should take their Glucophage (metformin) the morning of the exam, then discontinue for 48 hours. They may resume this medication after their referring physician has determined through a blood test that their kidney function has not deteriorated.
- 2) Patient must contact either Primary Care physician or Nephrologist to schedule an appointment for a blood test to be taken for evaluation of BUN & CREATNINE.
- 3) Patient must then get authorization from Physician to resume using GLUCOPHAGE (METFORMIN) according to the new lab results.
- 4) Patient should drink at least six eight ounce glasses of water on the day of I.V. contrast administration. I have read and understand the above instructions given to me with regards to GLUCOHPAGE.

## INSTRUCTIONS FOR PET/CT PATIENT PREPARATION

- The day before the scan you should eat a low carbohydrate diet, (no breads, pasta, potatoes, sugar or any products with a high sugar content). Drink water or low sugar beverages.
- Do not eat or drink anything except water for 4-6 hours before your exam because it may impair quality of images. You must also refrain from chewing gum.
- If you take medications, drink only enough plain water to swallow them.
- If you've been advised not to take your medications on an empty stomach, eat nothing more than a few soda crackers within 4-6 hours of your exam.
- If you feel feverish, please call this to our attention.
- If you have diabetes, please be sure to mention it to the scheduling staff who will discuss preparations in terms of your diet and your medications.
- In addition, please let us know if you might be pregnant or are currently breast feeding.
